PROFILE

I am a Full-Stack Developer with a true passion for Frontend engineering, where I can blend creative design with structured technical logic. Drawing on my experience in mentoring and training, I bring strong communication skills and a natural ability to keep teams aligned. I am genuinely driven by solving complex problems with others, maintaining high standards in my work, and building smooth, impactful user experiences

EXPERIENCE

IQJITA INNOVATIVE LLP

FullStack Developer cum Trainer

2025 (MAY) - 2026 (APR)

- **Built a Complete Institutional Platform:** Developed a comprehensive, all-in-one management and CRM software from scratch using React, Node.js, Express, and MySQL to take the institution's entire operations fully digital.
- **Designed Core Business Modules:** Handled the architecture for multiple interconnected systems within the app, including an HR and payroll module, a sales tool for lead tracking, and administrative portals for handling student admissions and fees.
- **Improved Everyday Workflow Speed:** Successfully centralized staff, student, and financial records into one dashboard, giving managers real-time data visibility and making day-to-day administrative tasks much faster.
- **Taught Core Web Development:** Planned and delivered hands-on training sessions for students, breaking down everything from frontend user interface design to backend databases.
- **Guided Live Project Development:** Mentored students through practical, real-world development cycles, helping them build live applications while teaching them clean coding habits and teamwork.
